## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1, 10, 14, 15, 17 and 18 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Claims recite, "indicating a mode of joining", which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

**Claims 1, 10, 14, 15, 17 and 18 are rejected under as being anticipated by 3GPP TS 25.346, V.1.1.0 (2002-5) (hereinafter 3GPP).**

Regarding **claim 1**, 3GPP teaches a method comprising:

Receiving a user equipment active list by a serving radio access network controller from a serving device of a core network, said user equipment active list being associated with a multicast/broadcast service (CRNC MBMS context is established between the RNC and the SGSN for a specific MBMS service, MBMS context contains a list of connected mode UEs which are present in each cell, section 5.1.1); and

Including one or more user equipments, the one or more user equipments indicating a mode of joining the multicast/broadcast service and being within a cell controlled by another controller (attach request in section 7.1.3)

Determining the cell of one or more user equipments indicating a mode of joining the multicast/broadcast service wherein said determining comprises checking the user equipment active list (signaling flow allow the CRNC to allow the CRNC to add a new UE to the total number of UEs in a given cell, section 7.1.3; SRNC decides whether to perform channel type switching to p-t-p or not, section 7.1.2);

sending the user equipment active list to said another radio access network controller which controls the determined cell ("The MBMS transmission initiation contains a list of U-RNTI ... corresponding to the UEs connected to the SRNC", section 7.1.4);

receiving a channel type configuration from said another radio access network controller for connection of the multicast/broadcast service to the one or more user equipments indicating a mode of joining the multicast/broadcast service ("The SRNC is the RNC controlling the RRC connection and RBs to a specific UE", section 7.1.2 and

Figure 2; Note: RBS related to channel type configuration , MBMS RBs control for p-t-m beares (section 5.1.1)); and

informing at least one of the one or more user equipments indicating a mode of joining the multicast/broadcast service about the multicast/broadcast service ("CRNC informs all the UE regarding the decision having p-t-m transmission,section 7.1.2 and Figure 2; also the above signaling flow is applicable for handling MBMS to UEs in IDLE and connected mode, section 7.1.1 )

Claims 10, 14-15, 17-18 are rejected for the same reason as set forth in claim 1.

### ***Response to Arguments***

Applicant's arguments with respect to claims have been considered but are moot in view of the new ground(s) of rejection.

### ***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
